

SUN VALLEY BRONZE

## SLIDING DOOR SOLUTIONS

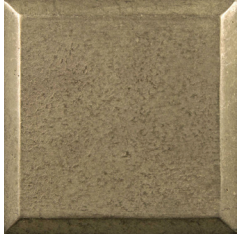

# FINISHES

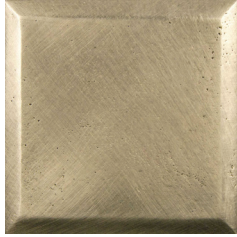

The oxidation process that Sun Valley Bronze uses to create patinas is an accelerated version of natural exposure to time, touch, and environment. Repeated handling of the hardware will lead to the graceful wear of the patina. Sun Valley Bronze believes patina wear is an inherent quality of the hardware. As with any hand-applied patina finish, color variations should be expected, lending character and distinction to elegant design.

## SILICON BRONZE

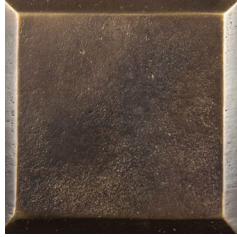

S - Silicon Bronze

Raw silicon bronze. No patina applied to the flat, tumbled bronze. Color is a light brown with a matte finish.

S1 - Burnished Silicon Bronze

No patina applied. Color is light honey brown. This finish will naturally oxidize with age to a light reddish-brown with some green on exterior or high humidity installations.

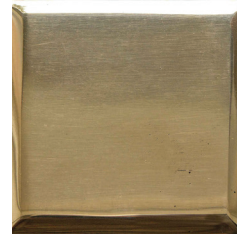

S2 - Medium Reddish Brown Patina

Color will darken over time.

S3 - Dark Brown Patina

Similar to an oil-rubbed bronze finish (similar to US10B). Color will darken over time.

SP - Polished Silicon Bronze

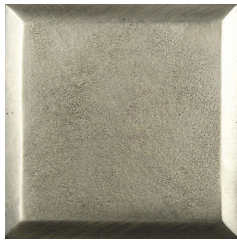

Similar to polished copper.

## WHITE BRONZE

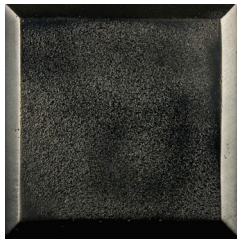

W - Raw White Bronze

No patina applied to the flat, tumbled bronze. Color is a nickel-silver with a matte finish.

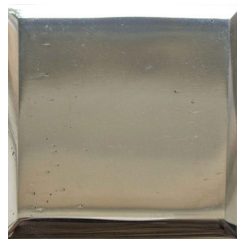

W1 - Burnished White Bronze

No patina applied. Color is light honey brown. This finish will naturally oxidize with age to a light reddish-brown with some green on exterior or high humidity installations.

W2 - Medium Pewter Grey Patina

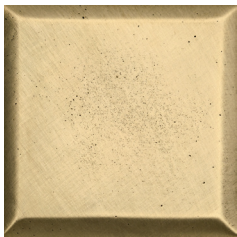

Dark Grey/Black Patina. Similar to US15A.

WP - Polished White Bronze

Similar to polished nickel.

## BRASS

B1 - Burnished Brass

No patina applied. Color has a light golden hue. This finish will naturally oxidize with age.

BP - Polished Brass

No patina or lacquer applied.
